Subject: fiduciary rules by labor dept

the gov,mt will ONLY cause more confusion!!!!the current laws need to be enforced at the institutional level. I was in the industry for over 17 years and i always did what was best for my clients, as did the majority of brokers whose managers did their job of approving every trade. with the increase use of computers this function seemed to disappear.

the wheel works, why create a new one...the investor will just be hurt by this needless new regulation

RAK
